Description of proposed revision:

This change revises the implementing standards from various sections of the ISMP to IAEA 50-SG-07 for safety criteria 7.6-1 through 7.6-4.

Reason(s) for the proposed revision:

RL/REG-98-20 requires that prior to the Authorization for Construction, BNFL must revise the SRD (Safety Criteria 7.6-2 and 7.6-3) to provide adequate subordinate standards for operational testing and maintenance (section 3.13 Condition 13 – Operational Testing, Inspection, and Maintenance). IAEA 50-SG-07 has been identified as the implementing standard.

Description of the proposed implementation schedule:

The standard will be incorporated into the SRD within 30 days of receipt of RU approval.

If the revision involves the deletion or modification of a standard previously identified in the approved SRD, provide:

- A. An evaluation that demonstrates the revised SRD continues to identify a set of standards that will provide adequate safety, comply with all applicable laws and regulations, and conform to top-level safety standards; and
- B. A certification that the revised SRD identifies a set of standards that continues to provide adequate safety, comply with all applicable laws and regulations, and conform to top-level safety standards.

Attachments:

- 1. Copies of the AB document(s) or appropriate excerpt showing the proposed revision(s).
- 2. Copy of safety evaluation.
- 3. If not included above, justification for the revision and demonstration that the revision is safe.
- 4. Items A and B above, if applicable.
